SKILLS:

Programming Languages: Python, Java, JavaScript, TypeScript, Bash, SQL

Operating Systems: RHEL (Red Hat Enterprise Linux)

Web Development Frameworks: Spring Boot, React, Angular, Node.js

Database Technologies: PostgreSQL, MongoDB, Oracle SQL Developer

DevOps & Infrastructure: Ansible, Docker, ActiveMQ, Apache Camel, Maven

AI Automation & Tools: Prompt Engineering, n8n, Windsurf, ChatGPT, Claude

EDUCATION:

Rutgers University - New Brunswick, 2022
B.S. in Computer Science | Minor in Cognitive Science

PROFESSIONAL SUMMARY:

Mission-driven software engineer passionate about building intelligent, reliable systems that empower both operations and people. Experienced in designing and maintaining distributed systems, backend infrastructure, and intuitive front-end interfaces. From finance to defense to emerging AI applications, my goal remains the same: engineer clarity from complexity and deliver technology that makes a meaningful impact.

WORK EXPERIENCE:

SOFTWARE ENGINEER - Application Based Architecture (ABA), P-8A Poseidon Program

Sabre Systems LLC., *Lexington Park, MD*
June 2024 - Present

- Built high-fidelity data sync between ABA and the mission system using Java, Apache Camel, ActiveMQ, and PostgreSQL, achieving perfect health data accuracy.
- Automated deployments with Bash, Python, and Ansible, improving installs, credential management, filesystem configuration, and runtime cleanup across hypervisors, VMs, and containers.
- Enhanced security posture by upgrading servers to TLS and remediating EvaluateSTIG findings, improving compliance to 96–98%.
- Developed a standardized PostgreSQL restoration process from containerized instances to local databases, enabling rapid recovery of mission data and improving system observability.
- Redesigned our Internal Health Monitoring System interface using Angular and TypeScript, upgrading overall usability for mission operators.

SOFTWARE DEVELOPER

Bessemer Trust via Randstad, *Woodbridge, NJ*
September 2022 - January 2024

- Built a PowerShell tool to reconcile 500+ financial documents, cutting correction time by 87% and completing deliverables two months early.
- Automated twice-daily manual procedure, cutting recurring tasks by 45% and saving over 30 minutes daily in server document processing.
- Managed ETL pipelines in production and QA, troubleshooting failures through log analysis and refining automation scripts to ensure data flow continuity.
- Wrote and executed SQL queries in Oracle and Microsoft SQL Server to support trade operations, update tables under strict time constraints, and generate user-requested reports.
