SKILLS:

Core Languages & Systems

Java, Python, JavaScript, TypeScript,
Bash, SQL, RHEL (Red Hat Enterprise
Linux)

Backend & Integration Frameworks

Spring Boot, Apache Camel, ActiveMQ,
Node.js, Maven

Frontend Development

Angular, React, NextJS, TypeScript

Databases & Data Systems

PostgreSQL, Oracle SQL, MongoDB

DevOps & Infrastructure

Docker, Ansible, CI/CD Practices,
Containerized Workflows

AI, Automation & Emerging Tools

n8n, Prompt Engineering, OpenAPI,
ChatGPT, Claude, Windsurf

EDUCATION:

Rutgers University - New Brunswick, 2022

B.S. in Computer Science | Minor in
Cognitive Science

PROFESSIONAL SUMMARY:

I'm a software engineer who learns by doing and grows through challenge. The harder the problem, the more opportunity there is to understand, refine, and build solutions that create real value. My work spans distributed systems, data flows, and user interfaces, with impact in finance, defense, and the evolving world of AI. At the core, I aim to build technology that empowers people and makes a meaningful difference.

WORK EXPERIENCE:

SOFTWARE ENGINEER - Application Based Architecture (ABA), P-8A Poseidon Program

Sabre Systems LLC., Lexington Park, MD
June 2024 - Present

- Led the redesign of the system's health data synchronization pipeline, restoring reliable mission-critical status reporting and earning an Above & Beyond Award
- Refactored Bash based network setup and storage service scripts to correctly detect and configure interfaces under new encryption hardware, restoring reliable ABA installation.
- Created a standardized PostgreSQL restore process from containerized systems to local environments, enabling rapid recovery of system data and improving overall observability.
- Modernized the health-monitoring UI using Angular and TypeScript, improving readability, responsiveness, and operator effectiveness.
- Increased security compliance to 96–98% deploying TLS upgrades and addressing outstanding EvaluateSTIG vulnerabilities.

SOFTWARE DEVELOPER

Bessemer Trust via Randstad, Woodbridge, NJ
September 2022 - January 2024

- Developed a PowerShell automation that reconciled 500+ financial documents, cutting correction time by 87% and accelerating deliverables by two months.
- Automated a twice-daily manual workflow, cutting recurring tasks by 45% and saving 30+ minutes per day in document-processing time.
- Oversaw ETL pipelines across production, QA and DEV, diagnosing failures through log analysis and enhancing automation to keep data flowing reliably..
- Authored optimized SQL queries in Oracle and SQL Server to support trade workflows, perform deadline-driven table updates, and produce targeted operational reports.
